

Meeting No. 5  
March 8, 2004  
Hamburg Town Board meeting  
S-6100 South Park Avenue  
Hamburg, New York 14075

Supervisor Hoak calls the meeting to order at 7:00 p.m.

Roll Call:	Patrick H. Hoak Joan A. Kesner Thomas Quatroche, Jr.	Supervisor Councilwoman Councilman
Absent:	D. Mark Cavalcoli Kathleen C. Hochul	Councilman Councilwoman
Also Present:	Catherine Rybczynski James Spute Richard Boehm Gerard Kapsiak Joseph Coggins Drew Reilly Robert Hutchison Martin Denecke Tim Regan Kurt Allen	Town Clerk Finance Director Deputy Town Attorney Town Engineer Police Chief Planning Consultant Town Assessor Director of Recreation Community Development Assistant Supervising Building Inspector

The Pledge of Allegiance was recited.

Information on Fire Exits was provided.

Catherine Rybczynski, Town Clerk, reads the following public notice as published in the Hamburg Sun and the Front Page:

7:00 p.m. Public Hearing on the increase and improvement of the Mount Vernon Sewer District.

EXTRACT OF MINUTES

Meeting of the Town Board of the

Town of Hamburg, in the County of Erie, New York

March 8, 2004

A regular meeting of the Town Board of the Town of Hamburg, in the County of Erie, New York, was held at the Town Hall, S-6100 South Park Avenue, Hamburg, New York, on March 8, 2004.

There were present: Board Members: Jr. Councilman	There were absent: Hochul., Councilwoman	Hon. Patrick H. Hoak, Supervisor; and Joan A .Kesner Councilwoman, Thomas Quatroche, D. Mark Cavalcoli, Councilman, Kathleen C. Catherine A. Rybczynski, Town Clerk, Richard Boehm, Deputy Town Attorney
---------------------------------------------------------	---------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

\* \* \*

The Supervisor stated that a public hearing had been called for this meeting at the Town Hall, S-6100 South Park Avenue, Hamburg, New York, at 7:00 o'clock P.M. (Prevailing

Time) to consider the increase and improvement of facilities of the Mount Vernon Sewer District, consisting of the replacement of approximately 3,020 to 3,790 linear feet of existing sanitary sewer lines, installation of approximately 180 linear feet of new sanitary sewer lines, installation of manholes and other improvements to existing sanitary sewer reaches, including any equipment, furnishings, machinery or apparatus, and any ancillary or related work required in connection therewith, and to hear all persons interested in the subject thereof concerning the same and for such other action on the part of the Town Board with relation thereto as may be required by law. The Town Clerk presented affidavits showing that the Notice of said public hearing had been duly published and posted pursuant to the provisions of Article 12 of the Town Law and had been mailed by first class mail to each owner of taxable real property in the District.

The Supervisor stated that the hearing in the said matter was now open and asked if there were any interested persons present who desired to be heard. The following persons appeared in favor of such increase and improvement of facilities of said District:

The following persons appeared in opposition to such increase and improvement of facilities:

Supervisor Hoak comments that Peter Godios is present to represent Mount Vernon Sewer District.

Mr. Godios introduces Gary Muffoletto from Nussbaumer & Clark, engineer for the project.

Mr. Muffoletto, project manager associated with the engineering firm of Nussbaumer & Clark, comments that the Mount Vernon Sewer District is proposing to replace approximately 3,790 linear feet of existing sanitary sewer, install 180 linear feet of new sewer and make repairs to existing sanitary sewer reaches. The new sewer is located between the library and Cloverbank Road and will extend from the Counties pump station to the existing sewer on the south side of Lake Shore Road. The existing sewer on the south side of Lakeshore Road will be replaced from the new sewer to Clifton Parkway, as will the existing sewers on both sides of Clifton Parkway, Lakeshore Road and Kennison Parkway. The existing sewer on the east side of Clifton Parkway from Lakeshore Road to Roanoke Drive and the first sewer reach of existing sewer on the west side of Clifton Parkway north of Lakeshore Road. Repairs will also be made to existing sewer reaches on the north side of Mount Vernon Blvd., there is one between Clifton Parkway and Norton Drive and one between Norton Drive and Roanoke Drive. The north side of Lakeshore Road (the first sewer reach east of Clifton Pkwy) the west side of Clifton Parkway (the sewer reach just east of the bend in Clifton) the east side of Cloverbank Road between Stewart Pkwy. And Mt. Vernon Blvd., and the east side of Kelsey Drive (one sewer reach between Lakeshore Road and Kirschner Pkwy). The estimated maximum cost of the proposed project is \$1,000,000, however, \$433,700 is expected to be paid from grant funds provided by the U.S. Environmental

Protection Agency and to be received by the Mt. Vernon Sewer District. This means the maximum estimated local share of the project cost is \$566,300 or an estimated annual average debt service of \$46,000 per year based upon a 20 year bond. This means that the conditional annual average tax would be \$42.00 per year for a typical single family residence in the Mt. Vernon Sewer District.

Mike McNamara, 4912 Clifton, questions if he will be included in the improvement. Mr. Muffoletto responds that there is a sewer on both sides of Clifton Parkway on the lake side. The side of Clifton Parkway that is on the Lakeshore Road side will be done from Lakeshore Road to Roanoke. Then on the opposite side it is the first sewer reach from Lakeshore Road heading onto Clifton Parkway approximately 240 feet. Mr. McNamara comments so from there on, they will still have the old sewers. Mr. Muffoletto responds correct, and then there is one repair to an existing sewer reach that is on the north side of the street just after the bend. Mr. McNamara questions if there will be any requirement from the owners to make new connections. Mr. Muffoletto responds the project will include a new service lateral, a riser pipe if necessary, and then the reconnection of his service to the new sewer if he is where they are replacing the existing sewer. So, this will not require him to dig up and replace the sewer line to his house. Mr. Muffoletto responds correct. Mr. McNamara then comments that there are overflows, one is near his house, are they going to be disturbed or changed in anyway. Mr. Muffoletto responds that the overflow on his side of the street will remain as is, the overflow on the opposite side when the new sewer is installed, the overflow will be reconnected to a new manhole in the same location, but the idea is with the new sewer, that overflow will operate less frequently. Mr. McNamara comments that as it is now, they get backflow from Lakeshore Road. Mr. Muffoletto comments that this is the primary purpose of the project, to try and alleviate some of that.

Joseph Kuczkowski, 2994 Avery Drive, comments that someone told him that the sewers in Mt. Vernon were not built to handle the load that they were going to have to take. Question #1 when the apartment complexes were built off of Rogers Road did the contractor pay for the sanitary sewers for those apartments or did the residents. Question #2 when the Southshore Plaza was built, were the sanitary sewer lines paid for by the contractor or the residents of Mt. Vernon Sewer District. Also comments that he doesn't remember the last time they had an election for members of the Mt. Vernon Sewer District Commissioners. Frank Pluta, Commissioner, responds that every year they have an election. Mr. Kuczkowski comments that he doesn't remember being notified. Mr. Pluta comments that there is a notice in the Hamburg Sun. Mr. Kuczkowski questions about the sanitary sewers and the golf course. The last they heard from anyone is that they would have to live with a secondary treatment center. That would have been cheap, because they already had the treatment plant and they owned the land. The water in the lake is being polluted by the golf course and the treatment facility and they still built more homes. Who paid for those sanitary facilities. Along the Lakeshore, from Hamburg Town Park south to Old Lakeshore Road and he would bet that they don't have a treatment facility. This water is running down to the lake, why are the people in Mt. Vernon responsible for this. Another question, are they hooked up to the new treatment center where the cement plant was, because they weren't supposed to be they were supposed to build their own.

Supervisor Hoak asks Mr. Kuczkowski to put his questions in writing.

Mr. Kapsiak comments that a lot of the areas he referenced were outside the Mt. Vernon Sewer District and have nothing to do with the project. For example, the Brierwood development, the apartments, the plaza, Locksley Park, Woodlawn, Blasdell, etc. they are all outside the project.

Gary Muffoletto comments that the wastewater collection in the Mt. Vernon Sewer District was constructed in the late 20's, early 30's, that included the sewage treatment plant that was located on Rogers Road and what used to be referred to as Mt. Vernon pump station #1. Then, in the seventies the Mt. Vernon Sewer District joined the Southtowns Sewage Treatment Agency at which time they became signatory to an agreement that allowed them to discharge their wastewater to what is now the southtowns sewage treatment plant on Lakeshore Road over by Mercy flight. When they did that, they abandoned the sewage treatment plant on Rogers Road in the early 70's or 80's when Mt. Vernon became part of the southtowns sewage treatment agency and they constructed the new pump station on Lakeshore Road. Mr. Kuczkowski questions why they paid for the lines to go all the way down to the southtowns sewage treatment facility. Mr. Muffoletto comments that this is a regional approach to sewage treatment.

Councilwoman Kesner comments that they have a map of the Mt. Vernon Sewer District and she asks that Mr. Kuczkowski take a look at it so that he would have a clearer understanding of what is within that district and who is paying for what. Mr. Muffoletto comments that along Lakeshore

Road, the length of the Mt. Vernon Sewer District, the State is planning on doing construction, along with the Town putting in new waterlines, so it makes sense that this would be the time to do new sewer lines. The plans, specifications and contract documents were submitted to the State for their review and comments. You do need their approval and permit.

Pat Hayes, 3019 Kirshner, questions where they could find the general scope of work for this project. Would it be available in the libraries.

Mr. Pluta comments that they could post it at the library and in different areas around the District.

Mr. Muffoletto comments that the construction will be primarily from Cloverbank, where the Cloverbank Hotel is, across and down Route 5 and then down Clifton.

Veronica Panfill, 4996 Morgan Pkwy, questions how large the sewer district is and how many homes does this improvement affect. Also, it states that there will be an annual assessment of \$42.00 per year for a typical family residence and would like them to define typical. She feels that the development along Rogers, going over the tracks, somehow affects their sanitary or storm sewers, maybe both, she would like that clarified as well.

Supervisor Hoak comments that the typical home is assessed at \$85,000, so you would have to go up or down from that.

Mr. Muffoletto comments that the district is made up of approximately 1,100 housing units.

Supervisor Hoak asks that copies of the map be made available at the Town Clerks Office.

Mr. Muffoletto comments that there are no sanitary sewer flows from the opposite side of the railroad tracks, that enter Mt. Vernon Sewer District. Mr. Kapsiak comments that all the storm sewer flows will be discharged into Barricks Creek. Councilwoman Kesner comments that she understands that the DOT is going to do some improvements along Barricks Creek.

Councilwoman Kesner questions when was the last time they replaced the sewer lines. Mr. Muffoletto comments that, to his knowledge, they have never been replaced. Since the 20's there have been repairs, but they have never been replaced. Councilwoman Kesner questions, for the record, why are they replacing them. Mr. Muffoletto responds that there has been a long, well documented history of sanitary sewer overflows and basement backups in various locations throughout the sewer district. Generally what was found, in most cases it is the result of the existing sewers not having adequate capacity to carry the flows to the Counties Pump Stations. What is happening is that flows that system is seeing are exceeding their carrying capacity which activates sanitary sewer overflows, and under extreme conditions causes basement backups. This is one part of a larger project and here, the advantage was that the sewer district had an opportunity to get some grant money from the U.S. EPA and then coordinate the work in conjunction with the States road reconstruction project.

Councilwoman Kesner comments, for clarification, there is a \$433,000 grant that is going to be applied to this and if they don't do this project now, the entire cost will go on the sewer district. Mr. Muffoletto comments that if they decided to do the project, at a later date, they would have to bear 100% of the cost which would essentially double the cost.

Mr. McNamara, 4912 Clifton, comments that he is a longtime resident and there is no question, this project is sorely needed. He has seen many floods in his basement. He has seen the street flooded and his neighbors basement flooded and he is happy to see this project going forward.

Veronica Panfill comments that he said this is part of a larger project and this problem goes back to the 20's. What is the history of every thing up the hill from Route 5 and Clifton Parkway, what has been done there, and what needs to be done and what will that cost in addition to what this project will cost.

Mr. Muffoletto responds that several years ago they replaced the sewer on Roanoke Drive which did a lot to alleviate basement backups and then on Roanoke what they had to do under certain weather events was to actually bypass pump, from sanitary manholes to adjacent storm sewers. They had to bypass pump only once since they did that. A larger project will be trying to identify the sources of infiltration and in flow and then remove them. The sewer district has taken a proactive approach, they annually clean the entire system to try and keep the system they have operating as efficiently as possible. They identified and corrected sources of excessive flow by

For the adoption of an amendment to said Zoning Code for 16.5 acres of Town owned property adjoining the Penn Dixie Fossil Site. The property is to be rezoned from M-1 (Industrial Park-Research and Development District) and M-2 (Light Industrial District) to PR (Park/Recreation Lands District) and further described as follows:

**PROPOSED REZONING**  
M-1 and M-2 to PR

ALL THAT TRACT OR PARCEL OF LAND, situate in the Town of Hamburg, County of Erie and State of New York, being part of Lot 8, Township 9, and Range 8 of the Holland Land Company's Survey, being further identified as all of tax map Parcel No. 160.09-5-4.11, and being more particularly bounded and described as follows:

BEGINNING at a point on the north line of North Street and the west line of West Street, as shown on Map Cover 694 filed in the Erie County Clerk's office; thence northerly and parallel with the west line of Lot 8, a distance of 1302.24 feet to the south line of the Hamburg Natural History Society, Inc. property; thence easterly along the south line of the Hamburg Natural History Society, Inc. property, a distance of 500 feet; thence southerly and parallel to the west line of Lot 8, a distance of 1177.23 feet; thence easterly along the south line of the Hamburg Natural History Society property, a distance of 627.59 feet; thence southerly at a right angle, a distance of 125 feet to the north line of North Street; thence westerly along the north line of North Street, a distance of 1125.72 feet to the point or place of beginning, and containing an area of approximately 16.75 acres.

THEREFORE, pursuant to the statutes and the provisions of the Municipal Home Rule Law, the Town Board of the Town of Hamburg will hold a public hearing on March 8, 2004 at 7:15 p.m. (local time), at which time all interested persons may be heard.

Dated: February 9, 2004

Catherine Rybczynski  
Town Clerk  
Town of Hamburg

Catherine Rybczynski, Town Clerk, states that there is one item of correspondence which is a letter from Gerard Koenig, Planning Board Chairman, forwarding a positive recommendation to the Town Board on this 16.6 acre parcel to a Parks-Recreation District for the following reasons:

1. This property is contiguous to an existing park owned by the Hamburg Natural History Society for public use.
2. The property offers a good buffer between residential properties and industrial areas.
3. the proposed change is a good use of the property.

Councilwoman Kesner comments that she had the opportunity to meet with the Hamburg Natural Historical Society to discuss this rezoning of land adjacent to the fossil quarry. They looked at the future use of that land. People from all over the world are now coming to this site and people from Universities are working with them, and all the museums as well. They are looking at taking the 16.5 acres and expanding the fossil site. The reason they would like to see this happen is that the activities at the site have expanded ten fold. They would like to change the entrance to the park off of the Jeffrey Boulevard site. This would be more suitable to handle all the traffic and activities. They have received a lot of complaints from the residents in that area concerning buses on their streets and the public walking through their yards. They want to protect the existing housing stock in that area and so this is a win, win situation for everyone in that area. The fossil quarry will have a first class entrance and this will be removed from the housing in the area. They feel that this is the best thing to do for everyone concerned. They are taking an extra step to make this fossil site a world class operation.

Drew Reilly gives a presentation showing the audience a map of the area that is being rezoned which adjoins the fossil quarry. Councilwoman Kesner points out the present entrance and where they plan to put the future entrance. Mr. Reilly now comments on the zoning of the property and surrounding properties. The fossil quarry is now zoned PR. They are looking to rezone the property to the PR zoning district. The Town does not want to sell this property with the industrial zoning that it has now and, with the Planning Boards recommendation, they would like to rezone it to PR and have it act as a buffer between the residential and industrial in the area. The town is not proposing a project for this property. This is not Town park land. This is land held by the Town, purchased with Community Development dollars, with the idea that possibly in the

**VI.**

**RESOLVED,** that proposed Local Law #10 of 2003, concerning the rezoning of 13 acres of property owned by Connie Sue Miller (Agent: Todd Klubeck) located on Willet Road from R-1 (Single Family Residence) to R-A (Residential Agricultural) be removed from the table.

Moved: Hoak  
Roll Call: Ayes: Hoak, Kesner, Quatroche  
Noes: None  
Carried

**VII.**

**WHEREAS,** in compliance with Part 617 of the implementing regulations pertaining to Article 8 (State Environmental Quality Review Act - SEQRA) of the Environmental Conservation Law, the Hamburg Town Board has reviewed the application submitted by Todd Klubeck for the rezoning of 13 acres, located on Willet Road from R-1 (Single Family) to R-A (Residential Agricultural) under the amended zoning law as of January 26, 1998, and

**WHEREAS,** the Town of Hamburg Planning Board during its review found no apparent significant environmental concerns and has recommended the rezoning, and

**WHEREAS,** this rezoning will not adversely affect the natural resources of the State and/or the health, safety and welfare of the public, and is consistent with social and economic considerations.

**THEREFORE BE IT RESOLVED,** that the Town of Hamburg has determined that the proposed rezoning and subsequent use of the site are not anticipated to result in any significant effect on the environment, and that a Negative Declaration (Notice of Determination of Non-Significance) is hereby issued.

**BE IT FURTHER RESOLVED,** that the Supervisor be authorized to sign the Environmental Assessment Form.

Moved: Hoak  
Roll Call:

Seconded: Quatroche  
Ayes: Hoak, Kesner, Quatroche  
Noes: None  
Carried

**VIII.**

**WHEREAS,** the Town of Hamburg has received a petition from Todd Klubek (Agent) for the rezoning of 13 acres of property located on Willet Road from R-1 (Single Family Residence) to R-A (Residential Agricultural), and

**WHEREAS,** the Planning Board has reviewed the project and recommended its approval to the Town Board, and

**WHEREAS,** the Town Board has held the appropriate public hearing and has determined that the project will not have a significant effect on the environment and issued a Negative declaration under State Environmental Quality Review Act, and

**WHEREAS,** the Town wishes to approve the proposed rezoning for the following reasons:

**Supporting Reasons**

1. The project is in accordance with the Town's Comprehensive Plan which supports Agricultural use and protection in the Town.

2. The rezoning will allow for the use of the existing Greenhouses on site, and return the property to a previous use.

### Conditions on the Rezoning

1. Due to property size constraints there shall be no raising or keeping of livestock on the property.
2. The project will receive site plan approval by the Planning Board.

**NOW THEREFORE BE IT RESOLVED,** that the zoning code of the Town of Hamburg be amended as follows:

To amend Local Law #10 of the year 1986, Chapter 280 of the Code of the Town of Hamburg entitled "Zoning". To provide for a change in the boundaries of the zoning map whereby the zoning is changed from R-1 (Single Family Residence) to R-A (Residential Agricultural) for the property located on Willet Road as described as follows:

ALL THAT TRACT or parcel of land situate in the Town of Hamburg, County of Erie and State of New York, being part of lot No. 437, T-10, R-7 of the Buffalo Creek Reservation, described as follows:

BEGINNING at a point on the south line of Willet Road (as 49.5 feet wide) at its intersection with the southerly line of land conveyed to the Terminal Railway by deed recorded in the Erie County Clerk's Office in Liber 747 of Deeds at page 125; thence easterly along the south line of Willet Road a distance of 250 feet to a point; thence southerly at a right angle with the south line of Willet Road a distance of approximately 660.11 feet to a point on the northerly line of lands conveyed to the Niagara Mohawk Power Corporation by deed recorded in the Erie County Clerk's Office in Liber 6672 of deeds at page 47; thence running westerly along the northerly line of said Niagara Mohawk Power Corporation lands 700.82 feet to an angle point; thence northwesterly along the northeasterly line of said Niagara Mohawk Power Corporation lands to its intersection with the southerly line of the said lands of the Terminal Railway; thence northeasterly along the southerly line of the said Terminal Railway lands to its intersection with the southerly line of Willet Road which is also the point or place of beginning, and

ALSO BEGINNING at a point on the south line of Lot No. 347 at its intersection with the east line of the Village of Blasdell said point also being the northwest corner of subdivision Lot No. 4 under Map Cover filed in Erie County Clerk's Office under Map Cover No. 1581; thence easterly along the south line of Lot No. 437 a distance of five hundred forty and fourteen hundredths (540.14) feet to a point on the southwesterly line of land conveyed to the Niagara Mohawk Power Corporation by deed recorded in the Erie County Clerk's Office in Liber 6672 of Deeds page 47; thence northwesterly at an interior angle of 32 degrees 12'27" along the southwesterly line of the said Niagara Mohawk Power Corp. land a distance of four hundred twenty-one and twenty-four hundredths (421.24) feet to an angle point; thence continuing along said Niagara Mohawk Power Corporation land southwesterly line at an exterior angle of 211 degrees 20' a distance of one hundred sixty-three and eighty-nine hundredths (163.89) feet to the southerly line of land conveyed to the Terminal Railway by deed recorded in the Erie County Clerk's office in Liber 747 of deeds page 125; thence southwesterly along the said southerly line of the Terminal Railway a distance of thirty-three and thirty-three hundredths (33.33) feet to the easterly line of the Village of Blasdell; thence southerly along the easterly line of the Village of Blasdell a distance of two hundred thirteen and twelve hundredths (213.12) feet to the south line of Lot No. 437 being the point or place of beginning.

Moved: Hoak

Seconded: Kesner

Supervisor Hoak asks them to give a time table for completion.

Mr. Cursio responds that they have to get certain approvals internally with existing tenants. Their goal is to start this year, but they have things that are out of their control that they are working on them.

Joe Kilian asks if there could be cameras and a guard at the children's play center, we hear about too many abductions. Mr. Cursio understands and comments that security in those areas are paramount. They designed it in a way that there is only one way in and out and they take this into account when they design and area like this.

George Lee, Deputy Mayor of Blasdell, questions on the food court if they could look into having outside seating. Mr. Cursio comments that they are looking into those type of amenities. George comments that you see more and more of this throughout the country, being able to go outside with a cup of coffee or tea. Mr. Cursio agrees and they are looking into making the outside more comfortable so people could go out and relax.

Felice Krycia, Hamburg Sun, comments that there have been some problems with youth in the Mall, especially in the summer. Will they be taking any extra steps to increase the security. Mr. Cursio comments that from a security point of view, they have a very well trained staff and they have a strong policy for policing youths. She has heard of numerous elderly people being intimidated.

Stephani responds that often others will hear things before they would come and tell her. The last figures they have from their customer intercept survey was there was a 98% approval rating on security.

Mr. Cursio comments that in the customer interviewing they have done, they have only heard positive things concerning security.

Councilwoman Kesner comments on the following resolution stating that this is very good news that the Town of Hamburg gets over 1/2 a million dollars for various projects. The first resolution talks about the original game plan and how it is changed. They increased their domestic violence appropriation because they received more money than they had planned.

**XIV.**

**WHEREAS**, the Hamburg Town Board adopted the following listed use of Community Development Block Grant funds for the 2004 program year at its year end meeting:

Planning & Program Administration	\$ 80,000
Public Service; Senior Aquatic Fitness (Continuation):	\$ 25,000
Public Service; Battered Spouse/Domestic Violence (Continuation):	\$ 50,000
Public Facilities; Village of Hamburg (Infrastructure):	\$145,000
